BLOCKCHAIN OVERVIEW

All components related to Bitelectroneum blockchain platform will run on the Ethereum network.

There are two co-dependent facilitators of all interactions on the blockchain detailed below:

Smart Contracts and the Bitelectroneum token.

Ethereum is different from Bitcoin because it allows you to create smart contracts that can be described as highly programmable digital money. Contrary to many other cryptocurrencies, Ethereum is not only a network for the exchange of monetary value but a network to run contracts based on Ethereum.

These contracts can be used safely to perform a large number of operations: electoral systems, registration of domain names, financial markets, crowd-funding platforms, intellectual property, etc.

Bitelectroneum reserves the right to use one or more blockchains within its project. This will allow us to be totally decentralized without depending on a single technology.

ABOUT BITELECTRONEUM (BETN) TOKEN

Bitelectroneum token is a store of value built on the Ethereum blockchain with a unique deflationary features; which will be used to bring about it users records around the globe, to store series of data's and to keep intensive history of all blockchain technology in the past and also in making.

DEFLATIONARY

Whenever BETN is transferred, 1% of the total amount will automatically burned due to its deflationary features.

WHY BITELECTRONEUM?

We built a platform for the history of cryptocurrency. A description of the token commercialization (product interaction with economy and technical provisions of commercialization):

The means of assessing all the above listed futures will be leverage on our token (Bitelectroneum) and also to make sure it is well protected with a secure web accumulating history.

Bitelectroneum is a long term project, all our calculations have been made in order to guarantee an “uninterrupted” production flow, (all this regardless of the various market fluctuations).

Our token will be essential for:

- Making a donation
- Purchasing a song
- Royalty Payouts

. It will be used as means of payment on the cryptology research system.

PROBLEM STATEMENT

Up till date, cryptocurrency has yet to gain mainstream adoption. The barriers to mass market adoption will be eliminated when become embedded into everyday commerce.

One of the major problem of blockchain technology is fast and low fee or zero translation, the fact that it literally easier to commemorate on the issue of transaction has become more tense these days.

Another issue is building intensive career opportunity on blockchain technology, I believe with the level of people coming in, to adapt digital asset a means of update and records should be kept fast.

It is difficult to find a dapp app for digital asset downloading and it has been a serious problem for decades.

A PROPOSED SOLUTION

After all said and done, Bitelectroneum (BETN) is set to bring about zero fee transaction trading, also to communicate in a short terms of blocks; is the reading of accurate data.

BETN token is set to bring about it users records around the globe and also to store series of data's to keep and intensive history of all blockchain technology in the past and also in making.

The means of assessing all the above listed futures will be leverage on our token (Bitelectroneum) and also to make sure it is well protected with a secure web accumulating history.

A description of the token commercialization (product interaction with economy and technical provisions of commercialization):

Our major focus is how to create a fast means of transaction with or without fee.

ZERO FREE TRADING

A monochromatic dapp system of sending and dating of information.

The use of Bitelectroneum (BETN) token in accessing current and past details of existing project.

It will also serve as terms of payment among members.

A product of dapp monopoly system...

BETN will help new users break out of the closedloop fiefdoms and encourage innovators to develop innovative blockchain services, including credit.

BETN tokens' much lower transaction fees eliminate overdraft fees because over-drafting funds on the blockchain is impossible.

BETN token will allow citizens to leverage a peerto-peer banking economy where everyone has complete control of his/her assets in hand.
